WHOLESALE PRICE LIST - - - 1952 CROP

OFFERING NORTHWEST GROWN LILY BULBS

From the Stocks of

EDGAR L. KLINE.....Lake Grove, Ore.
 LILYDALE BULB GARDENS.....Milwaukie, Ore.
 YEREX BULB GARDENS.....Newberg, Ore.
 WAND LILY GARDENS.....Troutdale, Ore.

In presenting our 1952 lily list to our customers we are pleased to introduce the new hybrids and new strains of older species listed below. You will find these a most valuable addition to any lily collection.

L. AURELIAN HYBRID "BRIGHT CLOUD"—This lily is a first generation hybrid from a cross made in 1940, *L. Henryi* x *L. Aurelianense* seedling. It has proven remarkably disease-resistant, vigorous and free flowering. Established plants reach the height of six feet or more and carry as many as twenty large broadly recurving flowers with margins and tips of pure white and centers of bright yellow. Its effectiveness in the garden is maintained over an unusually long period by the secondary blooms which open on the lower peduncles as the primary flowers are falling. Staking is advisable to help hold the broad panicles erect.

L. CHEROKEE—A new hybrid originated by Dr. E. F. Palmer with large brick red flowers dotted maroon. Flowers face out and slightly up on 4 to 5 ft. stems. Same parentage as *L. Red Bird* but later flowering carrying well into August. Carries stem bulbils. A very vigorous and brilliant plant.

L. CORDATUM (New Form)—A much improved form of *L. Cordatum* or possibly a new species intermediate between *Cordatum* and *Giganteum Himalaicum*. Large heart shaped foliage, bronze colored in early spring, turning green as the plant matures. Height 3 to 4 ft. Medium size green-white trumpets held horizontally, lightly dotted maroon at the throat and petal tips. Best in quite a bit of shade. Monocarpic.

L. JAPONICUM PLATYFOLIUM—A northern hardy form apparently intermediate between *L. Japonicum* and *L. Rubellum*. The pink trumpets are produced nearly as early as *Rubellum* but have the size and fragrance of *Japonicum* and broader foliage. 3 ft. tall. June flowering.

L. JILLIAN WALLACE—By far the most exciting lily produced in many years, this plant has created a sensation wherever displayed. Originated in Australia stocks have only in the past year been available in sufficient quantity to offer to the trade. This plant is a hybrid of *L. Speciosum Gilrey* x *L. Auratum "Crimson Queen"* and the flowers show the influence of both parents. The wiry stems rise from 3 to 5 feet. and carry huge outward facing flowers which open flat with slightly recurved petal tips. The color is basically white flushed and spotted crimson rose. They are delightfully fragrant. August flowering.

The following group of 3 new lilies are originations of Dr. R. C. Palmer who has previously produced a number of exceptionally fine hybrids. They are all strong growing, disease resistant plants of easiest culture carrying a wealth of flowers.

L. SAMARKAND (Skyrocket x Sultan)—Deep glowing red, borne on 3 to 4 ft. stems, pyramidal heads. Large martagon type flowers. July flowering.

L. SIRDAR (Skyrocket x Spitfire)—Glowing dark red, wide open, slightly reflexed and facing directly out. 3 to 4 ft. Mid-July flowering.

L. SIAM (Skyrocket x Spitfire)—Clear salmon-scarlet, turks cap type, semi-out-facing. Early July flowering. 3 to 3 1/2 ft.

SALES AIDS

Our "Reference Chart of Lilies for Garden and Greenhouse" contains over 2000 items of cultural information covering most of the commercial lilies and is available at \$1.00 postpaid. On request we are prepared to quote quantity prices on the chart for resale. A number of our customers are offering this along with their catalogue listing lilies.

In response to numerous requests we have prepared a leaflet on "Hardy Cyclamen Culture" which is free on request. A copy will be included in all cyclamen orders. Extra copies are also available to our customers for their retail trade.

As mentioned in our previous Trade lists, we now have available a new set of color transparencies for lecture and sales aid use. This set has been expanded during the past years and the list now includes over 200 subjects from which to choose. These photographs can be supplied as slides (2 x 2), enlarged transparencies in sizes 2 1/4 x 3 1/4 and larger or as color prints. A complete list of subjects available and details of their cost will be sent promptly upon request. In corresponding kindly advise whether slides, enlarged transparencies or prints are needed and approximate quantity.

In compiling this list of northwest grown lilies we have added several varieties of which we have ample stock to offer this season. Also we have had to withdraw a few because of having oversold last season. In addition to the varieties listed we grow moderate quantities of a number of other varieties and welcome inquiries concerning any of which are commercially available at the present time.

In the following price list we have endeavored to briefly describe all of the stock offered by indicating flower type and size, color, height (maximum average for mature established bulbs) and flowering period under Northwest climatic conditions. All hybrid lilies are so indicated, all others are species or varieties of them.

		Per 10	Per 100	Delivery Date
L. Amabile — Recurved, medium, orange red, 3 ft. Late June.	4-6".....	3.15	25.00	Oct.
